

MultiDoor 250 is a telescopic sliding door system
Suitable for wooden panel doors
Carrying capacity is 80 kg per door
Due to the rope system, the doors work synchronously.
There is a soft closer in the closing direction integrated into the upper mechanism.
Able to use assembly with 30 - 50 mm wood panel
Each door runs on a separate rail profile
Due to additional door set, the number of doors can be increased
System is working silent and long life working because of high quality ball bearings
System has plastic stopper
Aesthetic appearance and healthy working system
Easy and quick installation
It hides the mechanism details thanks to the optional closing profile that can be mounted on the rail.

Able to adjustment up and down

Through the closing profile mounted on the rail, hides the mechanism details

Minimum door width should be 670 mm

MultiDoor 250 Carrier has a retarder system integrated into the mechanism.
