

MultiDoor 260 is a sliding telescopic door system designed for wooden panel doors.

It has a carrying capacity of 80 kg per door,

The doors operate in sync due to the rope system.

It is suitable for use with panel thicknesses of 30 - 50 mm,

Each door operates on a separate rail profile.

The number of doors can be increased with an additional door set.

Due to high-quality bearings, it provides quiet and long-lasting operation,

The system includes stoppers.

It has an aesthetic appearance and a healthy operating system,

Offering easy and practical installation.

It conceals mechanism details with an optional cover profile that can be mounted on the rail.

Height adjustment can be made to the upper mechanism.

The minimum door width should be 976 mm.

MultiDoor 260 has an integrated soft-closing system in the carrying mechanism.
